Apollo Rajshree Hospitals, Vijay nagar,Indore	Job Profile: Consultant Cardiac Surgeon Duration: [Aug 2017 - till date]
--	---

I have recently joined the prestigious Apollo group of hospitals which is renowned for cardiac care in the country for over 25 years. They are known to provide state of the art patient care both in terms of human resources as well as infrastructure. I am proud to be leading the cardiac surgery department at such an illustrious institute. We are able to provide complete spectrum of cardiac surgery care including beating heart surgery, minimal invasive heart surgery, heart failure and aneurysm surgery.

Mohak HiTech Hospital Indore, M.P.	Job Profile: Consultant Cardiac Surgeon Duration: [Oct 2010 -July 2017]
---------------------------------------	--

I was chief cardiac surgeon at Mohak Hitech hospital for last seven years. Our unit performed about 300-350 cases per year and we successfully operated upon all kinds of elective and emergency cardiac cases including High risk CABG with Mitral valve repair, Ischemic VSD repair, Aortic root replacement, Dor procedure and Pulmonary embolectomy- to high light a few.

University of Alberta Hospital Edmonton, Canada	Job Profile: Fellowship in advanced adult cardiac surgery Duration: [July 2008 - June 2010]
--	--

The center does around 1500 open heart adult cases per year and covers entire spectrum of **adult cardiac surgery including heart and lung transplantation and mechanical circulatory support**. As a fellow I was responsible for taking pre, intra and postoperative patient care. In the operating room, I assisted and performed all kinds of procedures including transplantation and heartmate2 implantation. The responsibility also included taking care of 19 bed cardiovascular during in-house calls

Prince Aly Khan Hospital Mumbai, India	Job Profile: Training in Beating Heart Surgery [OPCABG]&Total arterial revascularization[TAR] Duration: [2005-2007]
---	--

As an associate consultant, I assisted and performed various cardiac surgeries. The center focused on **OPCABG and total arterial revascularization**. Here I understood and learned nuances of beating heart surgery. Learned the importance of case selection based on target quality, and LV function etc. Also recognized that at times complete revascularisation cannot be done off pump and the primary aim is complete revascularization- not beating heart surgery. Extensively used **Bilateral mammary arteries [both in-situ & as Y graft]**.

King Edward Memorial hospital Mumbai, India	Job Profile: Resident in Cardiothoracic and Vascular Surgery Duration: [August 2002 - August 2005]
--	---

The institute [which boasts of having one of the **India's best and oldest** cardiothoracic surgery department] provided me with **basic training and exposure** to a vast spectrum of both cardiac and thoracic cases including CABG, Aortic aneurysms, valve repairs/replacement, congenital heart disease and infective and malignant lung and mediastinal pathology. Also received basic **vascular surgery** training. My responsibilities included participating in out-patient clinics, in-patient evaluation, operative treatment of routine and emergency **cardiothoracic surgery** cases, post-operative care of patients in cardiothoracic ICU. Participated in around 1200 open and closed heart surgeries and other thoracic surgery and vascular cases, performed during this period.

Mahatama Gandhi Medical College & M.Y.Hospital Indore, M.P	Job Profile: Resident in General Surgery Duration: [June 1999 - May 2002]
---	--
